TC ID	Test Case Title	Pre-conditions	Test Steps	Expected Results	Actual Results	Status
TC_REG_001	Verify successful registration with all valid details	User is on the Register page; username is not already taken	1. Click 'Register' link 2. Fill in all required fields (First Name, Last Name, Address, City, State, Zip Code, Phone, SSN, Username, Password, Confirm Password) with valid data 3. Click 'Register' button	Account is created successfully. Confirmation message displayed. User is auto-logged in and redirected to Accounts Overview.	as expected	PASS
TC_REG_002	Register with already existing username	A username already exists in the system	1. Open Register page 2. Fill all fields with valid data 3. Enter a username that already exists 4. Click 'Register' button	Error message displayed: 'This username already exists.' Account is not created.	as expected	
TC_REG_003	Register with mismatched Password and Confirm Password	User is on the Register page	1. Fill all required fields 2. Enter Password 3. Enter a different value in Confirm Password 4. Click 'Register' button	Validation error displayed: 'Passwords did not match.' Account is not created.	as expected	
TC_REG_004	Register with mandatory field(s) left empty	User is on the Register page	1. Leave one or more required fields (e.g. First Name, Username) empty 2. Fill remaining fields 3. Click 'Register' button	Field-specific validation message displayed (e.g. 'First name is required.'). Registration is not submitted.	as expected	
TC_REG_005	Register with invalid/alphanumeric characters in Zip Code field	User is on the Register page	1. Fill all fields with valid data 2. Enter alphanumeric characters in Zip Code field 3. Click 'Register' button	Appropriate validation message displayed, or field rejects non-numeric input.		
TC_REG_006	Register with invalid/alphanumeric characters in Phone or SSN field	User is on the Register page	1. Fill all fields with valid data 2. Enter alphanumeric characters in Phone Number and SSN fields 3. Click 'Register' button	Appropriate validation message displayed; registration not processed with invalid data.		
TC_REG_007	Register with weak/short password	User is on the Register page	1. Fill all fields with valid data 2. Enter a very short password (e.g. '1') 3. Confirm same password 4. Click 'Register' button	Registration is processed per app's validation rules; if no minimum length enforced, this should be flagged as a potential improvement.		
TC_REG_008	Verify all mandatory fields are marked/indicated	User is on the Register page	1. Open the Register page 2. Observe the form labels	Mandatory fields are clearly indicated (e.g. asterisk or label styling).		
TC_REG_009	Verify newly registered user can log in	A new account was just created via registration	1. Register a new account 2. Log out 3. Log in again using the newly created username and password	Login succeeds and Accounts Overview page is displayed for the new user.
